Increase in the demand for cement in the construction sector and rise in demand for poly vinyl alcohol fiber in the textile market propel the global poly vinyl alcohol fiber market. On the other hand, fluctuations in price in petrochemical feedstock hinder the growth of the market. On the contrary, rapid innovations to overcome challenges in the market and the growing demand from developing countries are expected to create many opportunities for the market players in the future.

Based on product, the staple segment accounted for the largest market share in 2020, contributing to nearly three-fifths of the total share, and is expected to maintain the lead throughout the forecast period. On the other hand, the filament fiber segment is estimated to witness the fastest CAGR of 4.6% from 2021 to 2030.

Based on application, the textile segment contributed to the highest market share in 2020, contributing to more than two-fifths of the total market share, and is anticipated to dominate the market during the forecast period. On the other hand, the non-woven fabrics segment is

expected to manifest the fastest CAGR of 4.9% from 2021-2030.
