

Dynaudio wins EISA 2025 awards double

One accolade each for the Confidence 20A and Contour 20 Black Edition

SKANDERBORG, DENMARK, August 15, 2025 /EINPresswire.com/ -- Dynaudio's two newest speakers – Confidence 20A and Contour 20 Black Edition – have each won a prestigious award from EISA (the Expert Imaging and Sound Association).

Active listening

Confidence 20A is an active version of the Danish company's flagship standmount speaker. Its on-board studio-grade amplification and set-up controls are hidden in its custom-designed stand, and it comes complete with reference-level DSP and room compensation derived from Dynaudio's Core professional studio monitors. All that's required of the listener is a source; there are analogue and digital connections for all needs.

EISA's judging panel said: "The latest addition to Dynaudio's flagship

Confidence series becomes the brand's premium active loudspeaker – and makes a stunning impression. The Confidence 20A's beautifully judged sonics offer controlled bass, crystal-clear detail and thrilling dynamism. This is a high-end, gorgeously styled active speaker that delivers the sonic goods, but without the hassle that high-performance audio sometimes entails."

Leif Schmücker, Dynaudio's Confidence 20A Product Manager, said: "Confidence 20A represents an entirely new approach to high-end active loudspeakers. Dynaudio invented the category with its Xeo and Focus XD ranges a decade ago – and this latest award recognises all the effort that's gone into creating the most elegant way to build the simplest audiophile system. It's a real

honour.”

Its EISA award comes on the back of stellar verdicts since its 2025 launch, including an Outstanding Product award from Hi-Fi News and the Reviewers’ Choice gong from SoundStage! Hi-Fi. You can see them all at <https://dynaud.io/20a-reviews>.

Dark star

Contour 20 Black Edition is a radical upgrade of the already award-winning Contour 20i. Every component has

been given an overhaul, including the tweeter (which is now Dynaudio’s flagship Esotar 3), the new neodymium-equipped mid/bass driver, a redesigned and simplified crossover and a custom-tuned bass port.

The EISA judges’ verdict: “Offering a far larger improvement over the regular Contour 20i than the mere addition of a ‘Black Edition’ label might suggest, these standmount loudspeakers are a testament to the ingenuity of Dynaudio’s R&D department... its revisions bring about a scintillating performance focused on authenticity. The Contour 20 Black Edition excels at playing music as it was intended by the artist, and the bass extension is remarkable for a standmount design, bringing full-range listening to spaces unsuited to larger models. And, of course, the all-black finish is sumptuous!”

Julien Bergere, Dynaudio’s Chief Commercial Officer, said: “We’re thrilled to have won an EISA award for Contour 20 Black Edition. We set out to design the most natural-sounding standmount loudspeaker ever – so it’s fantastic to hear from reviewers that all our hard work has paid off.”

Contour 20 Black Edition has also gained plaudits from across the industry, including a Hi-Fi News Outstanding Product award. You can read them at <https://dynaud.io/be-reviews>.

EISA is a collaboration between 52 of the world’s most respected specialist consumer-electronics publishers. The best products in their category are nominated by these independent magazines, which then discuss them in detail at an annual awards meeting – where final, confidential, votes are cast.
