

# Ethiopia Spices Market Forecast to Reach Over 31097.44 Metric Tons by 2030, at a CAGR of 2.9% from 2024 to 2030

*Ethiopia Spices Market revenue is expected to grow at a CAGR of 2.9% from 2024 to 2030, reaching nearly 31097.44 Metric Tons.*

WILMINGTON, DE, UNITED STATES, September 8, 2025 /EINPresswire.com/ -- Chilli peppers dominate as demand rises—fueled by domestic consumption, growing export interest, and rich agroecological heritage.

[Ethiopia Spices Market](#) Overview

Ethiopia Spices Market is experiencing a steady upward trajectory, with total volume estimated at 30,221 metric tons in 2023 and expected to climb to approximately 31,097 metric tons by 2030, CAGR of 2.9% between 2024 and 2030. Anchored by a long-standing culinary tradition and diverse agroecology, the sector is gaining traction both within the country and in international markets.

“

Chilli peppers continue to reign, but the time is now to leverage value addition and expand export reach for emerging spices.”

Navneet Kaur

## Key Highlights

### Dominating Product Segment:

Chilli peppers currently lead the market, accounting for approximately 75% of total volume share in 2023—a trend projected to continue through the forecast period—driven by their central role in Ethiopia’s cuisine and adaptability to

varied agroecological zones.

### Key Growth Driver:

Spices market expansion is propelled by rising domestic consumption, sustained by population growth and evolving culinary preferences, along with gradually increasing export activity responding to global demand.

## Recent Developments

### Latest Figures (2023–2030):

The Ethiopian spices market stood at ~30,221 metric tons in 2023, forecast to reach ~31,097 metric tons by 2030, reflecting a modest yet steady CAGR of 2.9%.

### Notable Production Trends:

Chilli peppers remain the dominant staple and are expected to sustain their strong market share through 2030, supported by both traditional usage and agroecological diversity.

### Export Momentum:

Ethiopia continues to advance its export presence; between October 2023 and September 2024, 16 spice export shipments were recorded, reaching key markets such as the United States, France, and Australia.

## Market Dynamics

**Culinary Tradition & Domestic Demand:** Ethiopian cuisine relies heavily on spices—especially chilli—ensuring steady baseline consumption across households and eateries.

**Agroecological Advantage:** Ethiopia's varied climate and soils support robust spice cultivation, particularly for chilli peppers, which thrive across diverse growing conditions.

**Export Potential & Policy Focus:** While domestic consumption remains dominant, growing interest from foreign buyers is stimulating gradual export growth. Government efforts to support value chain improvements—such as processing and quality controls—are catalyzing this shift.

**Import Dependency for Certain Spices:** Despite strong local production, Ethiopia still imports certain spices (to the tune of ~\$800,000 annually), highlighting gaps in supply and unlocking opportunities for import substitution and value chain scaling.

**Moderate Growth Outlook:** A CAGR of 2.9% signals steady performance; expansion opportunities lie in diversifying spice types, enhancing processing, and boosting export competitiveness.

## Product Segmentation

### By Spice Type:

Chilli Peppers (largest share, ~75%)

Other spices (e.g., turmeric, ginger, korarima/cardamom), representing the remaining 25%, though underrepresented in mainstream volumes

### By End Use/Application:

Culinary Use (dominant)—household cooking, traditional dishes

Potential emerging sectors: medicinal, aromatic / essential oils, industrial, though currently limited

By Distribution Channel:

Local Markets & Retail (B2C): Traditional open-air and specialty shops

Exports / Institutional: Through formal supply chains and growing trade partnerships

## Key Trends

**Chilli Pepper Dominance:** With a commanding market position, chilli remains central to Ethiopia's spices sector—both culturally and economically.

**Emerging Non-Chilli Varieties:** Interest in niche spices like korarima (Ethiopian cardamom used in berbere blends), turmeric, and ginger is slowly rising among local chefs, artisan producers, and international buyers.

**Import Substitution Strategy:** The country's reliance on imported spices underscores prospects for scaling local production, enhancing quality, and expanding product variety.

**Export Infrastructure Expansion:** Growth in export shipments signals the importance of improving logistics, quality assurance, and value-add processing.

**Market Growth Through Value Addition:** Opportunities abound in branded, packaged spice products tailored for both domestic modern retail and export markets.
