

Rad Web Hosting Named Verified Green Hosting Provider by Green Web Foundation

Rad Web Hosting earns Green Web Foundation verification for renewable-powered data centers and sustainable web hosting solutions.

DALLAS, TX, UNITED STATES, October 13, 2025 /EINPresswire.com/ -- [Rad Web Hosting](#), a leading provider of web hosting, VPS servers, and [dedicated server hosting](#), has been officially recognized by the Green Web Foundation as a Verified Green Hosting Provider.

Rad Web Hosting Named Verified Green Hosting Provider by Green Web Foundation

The certification confirms that Rad Web Hosting’s infrastructure and data center operations are powered by renewable energy and meet the Foundation’s sustainability benchmarks. As part of the global Green Web community, Rad Web Hosting joins other verified providers committed to reducing the environmental impact of the internet.

“

Sustainability is not just an initiative—it’s a core value. We’re proud to provide clients with eco-friendly hosting solutions that help build a cleaner web.”

Scott Claeys, CEO of Rad Web Hosting

“Sustainability is not just an initiative—it’s a core value,” said Scott Claeys, Founder/CEO at Rad Web Hosting. “Being recognized by the Green Web Foundation underscores our dedication to delivering high-performance hosting while protecting our planet. We’re proud to provide clients with eco-friendly hosting solutions that help build a cleaner web.”

A Verified Step Toward a Fossil-Free Internet

Rad Web Hosting’s verification aligns with its long-term sustainability plan, which includes a multi-layered approach to energy efficiency and carbon reduction:

100% of infrastructure powered by renewable energy sources
Active participation in Stripe Climate’s carbon removal program

Continuous investment in energy-efficient servers and cooling technologies

Commitment to transparency and sustainability reporting

Each of the company's global data center locations leverage advanced energy optimization and renewable energy sourcing to ensure maximum performance with minimal environmental footprint.

About the Green Web Foundation

The Green Web Foundation is a nonprofit organization that tracks and verifies the use of renewable energy in internet infrastructure. Its mission is to create a fossil-free internet by 2030, providing open tools and data for businesses to make greener digital choices.
