"Tears to a Glass Eye" will be screened at the Coronado Island Film Festival on Sunday, November 9, 2025, from 1-3 pm at the Coronado Performing Arts Center, when writer-director Kenny will take audience questions. Kenny also will be available for press interviews before and after the screening.

The lead actor portraying detective Dye is Nevada native, Chris Browning, who has been in "310 to Yuma" (2007), "Terminator Salvation" (2009) and

"Cowboys & Aliens" (2011). The film also features critically acclaimed actress Natasha Henstridge (as Dori), who has starred in the science-fiction thrillers "Species" (1995), "Species II" (1998), and "Species III" (2004) and in "The Whole Ten Yards" (2004), among others. In the Species franchise, Natasha received praise as an actress who redefined the "femme fatale" for a new generation.

Kenny said he chose both Browning and Henstridge because of their upbeat personas, which counter the usual dark atmosphere of a traditional neo-noir detective film.

"A neo-noir detective film must have some traditional noir elements, but it must also have some difference," said Kenny. "I fashioned "Tears to a Glass Eye" to engage audiences in the mystery and noir thrills but also to provide audiences with a bit of upbeat material to savor," he said. "The characters and plot center not on the usual noir urban setting, but on a kind of everyday American town, where yet anything can happen," he explained.
