

ProPlaintiff.ai Joins PHX Fast FWD Accelerator to Scale AI for Personal Injury Law

Agentic AI platform for personal injury law secures spot in year-long accelerator focused on sustainable growth and market expansion

PHOENIX, AZ, UNITED STATES, October 20, 2025 /EINPresswire.com/ -- ProPlaintiff, the agentic AI platform purpose-built for personal injury law firms, today announced that co-founders Jason Turnquist and Kristopher Rezagholi, Esq. have been accepted into the [PHX Fast FWD Accelerator](#). The selective year-long program, created by PHX Ventures, supports software startups demonstrating product-market fit and sustainable revenue growth as they scale operations and expand market presence.

ProPlaintiff's selection underscores its position as a leading legal AI innovator, closing critical gaps in personal injury case management. Unlike general-purpose AI tools such as ChatGPT or Claude, which lack the security standards and legal-domain expertise required for confidential casework, ProPlaintiff.ai operates as a HIPAA-secure platform trained on 6.7 million case law files and built with an agentic case management system. The platform empowers attorneys and paralegals to automate document and demand letter drafting, [generate AI medical chronologies](#), perform legal research, and manage cases from intake through settlement. On average, law firms using ProPlaintiff.ai save 12 hours per case, translating to thousands of dollars in annual savings.

"The Fast FWD Accelerator focuses on coaching, capital, and community, which are critical elements as we scale ProPlaintiff's agentic AI platform," said Turnquist. "This program helps founders think strategically about sustainable growth while reinforcing Phoenix's commitment to

becoming a top software city."

"ProPlaintiff was built to give law firms the same technological advantage that fintech and healthtech companies have enjoyed for years—but within a framework that respects client confidentiality and legal ethics," said Rezagholi. "Being part of PHX Fast FWD validates not just our product-market fit, but our mission to modernize personal injury law through secure, agentic AI systems that actually understand legal workflows."

PHX Fast FWD targets startups that have achieved traction and are looking to accelerate their growth. The program delivers targeted mentorship from experienced operators, fundraising guidance with investor network access, and peer accountability through monthly in-person gatherings and weekly founder check-ins.

ProPlaintiff recently launched Version 3 of its platform, featuring an AI Agent Framework that allows firms to customize workflows, create customized templates, accurate medical chronology timelines, source citations pulled directly from uploaded documents, and case insights powered by advanced analytics. The company is actively developing additional agentic features, including client intake automation and expanded automated document generation capabilities.

HIPAA compliant environment, ideal for sensitive documents that Law Firms often handle. Unlike general AI tools, ProPlaintiff functions as a complete legal AI ecosystem with AI agents, case management, collaboration tools, and templates that ensure consistency at scale.

About PHX FWD

PHX FWD is a Phoenix-based nonprofit, backed by PHX Ventures, with a bold mission: to make Phoenix one of the nation's leading software hubs by 2035. To drive this vision, PHX FWD launched a year-long accelerator program designed for software startups of all sizes across the Valley. The program combines coaching, capital, and community, empowering founders to achieve product-market fit and sustainable traction through monthly in-person sessions, weekly peer accountability, and hands-on mentorship from seasoned industry experts.
