What Are The Key Driving Factors For The Growth Of The Facilities Support Services Market?
Facilities support services market's growth is bolstered by the increasing number of

multinational corporations (MNCs). An MNC typically operates in its home nation while also producing or selling its products or services in multiple countries, thereby establishing a presence in numerous regions. Managing facilities spread across different locations can be intricate and demanding. However, facilities support services provide a comprehensive solution that helps MNCs maintain and manage their facilities uniformly across distinct geographies, simplifying operations and ensuring consistent standards of facility management. For example, data from the Australian Bureau of Statistics reveals a significant increase in new business registrations in Australia in 2023-2024, with 436,018 new registrations surpassing the prior year's 406,365 new businesses in 2022-2023. Therefore, the growing number of multinational corporations is playing a significant role in the expansion of the facilities support services market.

Who Are The Key Players In The Facilities Support Services Industry?

Major players in the Facilities Support Services include:

- Jones Lang LaSalle Inc.
- Sodexo
- CBRE Group
- ISS A/S
- Cushman & Wakefield Inc.
- Atalian Servest Group Limited
- Emcor Group
- Alstom SA
- ABM Industries Inc.
- Grupo ACS.

What Are The Key Trends Shaping The Facilities Support Services Industry?

Firms that provide facilities support activities are progressively utilizing technology to streamline their recruitment processes and better manage their pool of applicants. Advancements in technology have introduced features such as activity monitoring, integration with email systems, and the capability to maintain extensive applicant databases. The result is a noticeable decrease in time spent on recruitment, improved candidate placements, and strengthened ties with clients. Furthermore, recruitment analytics software grants staffing agencies valuable business intelligence. For instance, as much as 64% of companies in North America employ technologies like an applicant tracking system (ATS) to monitor applicant actions while around 60% of firms rely on a customer relationship management (CRM) system to foster business growth.
