

# BC Engineering Group Expands Civil Engineering Services Across Sonoma, Marin & Napa Counties

*Leading Northern California multidisciplinary firm delivers civil engineering, land planning and wastewater solutions in Sonoma, Marin and Napa counties.*

SANTA ROSA, CA, UNITED STATES,  
November 11, 2025 /

EINPresswire.com/ -- BC Engineering Group, Inc. a privately-owned multidisciplinary civil engineering and land planning firm headquartered in Santa Rosa, continues to provide a full suite of civil engineering, land planning, and wastewater system design services across Sonoma County, Marin County and Napa County. With a strong reputation for regulatory expertise, sustainable design and project responsiveness, BC Engineering Group positions itself as a go-to partner for government agencies, commercial developers, residential investors, wineries and agricultural clients throughout the North Bay region.

Founded by Thomas Billeter and a team of experienced engineers, BC Engineering Group holds a track record of delivering civil engineering, site feasibility studies, grading and drainage design, roadway and utility design, erosion and sediment control, landscape architecture and specialized wastewater systems - including winery and vineyard-related wastewater treatment. The firm's multidisciplinary approach brings together civil engineering, landscape planning and land development under one roof, reducing coordination risk, accelerating project timelines and improving value for clients.

## Regional Reach & Local Expertise

[In Sonoma County](#), BC Engineering Group works with municipal agencies, developers and homeowners across Santa Rosa, Healdsburg, Petaluma, Sebastopol, Windsor, Rohnert Park,

Cloverdale, Calistoga, Sonoma and Bodega Bay.

[In Napa County](#), the firm supports vineyard expansions, winery infrastructure, wastewater treatment systems and site-development planning across Napa, St. Helena and Yountville.

[In Marin County](#), BC Engineering Group brings its civil and landscape architecture services to projects in San Rafael, Novato, Fairfax and surrounding communities.

Because BC Engineering Group combines civil engineering with landscape architecture and land-planning services, clients benefit from a coordinated development workflow, from site evaluation through permitting, 2D/3D conceptual design, regulatory compliance and construction oversight. The firm's philosophy emphasizes transparent communication, regulatory knowledge, and responsive service - a model expressed in its slogan: "Honesty Comes First – A New Era of Civil Engineers."

### Value Delivered to Projects

For residential and commercial property investors, BC Engineering Group offers grading and drainage design, roadway and utility layout, and full permitting support. This reduces cost surprises and accelerates time-to-market.

For industrial and manufacturing clients, the firm provides site feasibility studies, utility coordination, erosion and sediment control design, and construction management services to keep projects on schedule and compliant.

For agriculture and vineyard/winery owners, BC Engineering Group offers specialized wastewater and treatment system design, vineyard roadway and utility design, low-impact development solutions, and agency coordination for California regulatory bodies.

### Why This Matters for North Bay Clients

Selecting a locally-based engineering and planning partner like BC Engineering Group ensures familiarity with region-specific regulations, soils, drainage patterns and local agency processes. With more than 35 years of direct professional experience and over 100 years of combined team expertise, the firm has established strong relationships with state, federal and local agencies. These relationships reduce permitting risk and help clients proceed with confidence.

### Key Services Overview

Civil Engineering: site feasibility, grading and drainage design, roadway/utility design, erosion & sediment control

Land Planning: zoning and master planning support, detailed design development, agency permitting

Landscape Architecture: site analysis (topography, solar orientation, microclimates), 2D/3D conceptual modeling, sustainable landscape design

Wastewater Systems: septic system design, groundwater/percolation testing, wastewater treatment for residential, commercial and agricultural clients — with a specialty in winery wastewater systems

BC Engineering Group invites project owners in Sonoma County, Marin County and Napa County to initiate a consultation and evaluation meeting to begin the process of concept development, compliance review and construction-ready planning.

### About BC Engineering Group

Headquartered at 2800 Cleveland Ave, Suite B, Santa Rosa, CA 95403, BC Engineering Group is a privately owned multidisciplinary engineering and planning firm. Serving projects across Northern California - from Marin to Willits and Bodega Bay to Sacramento - the firm is committed to honesty, integrity, strong client relationships and high-performance delivery.
