

RedSeal Recognized in the 2025 Gartner® Magic Quadrant™ for Exposure Assessment Platforms

Company delivers a comprehensive continuous threat exposure management solution for large-scale, hybrid enterprise and government environments

MENLO PARK, CA, UNITED STATES, November 13, 2025 /EINPresswire.com/ -- RedSeal, a pioneer in proactive exposure management, today announced its inclusion in the inaugural 2025 Gartner® Magic Quadrant™ for Exposure Assessment Platforms.

“

We are proud to be recognized in this inaugural Magic Quadrant™. We continuously align our roadmap to address current threats, respond to customer needs, and leverage advanced technologies.”

Greg Enriquez, CEO of RedSeal

“We are proud to be recognized in this inaugural Magic Quadrant™ for Exposure Assessment Platforms,” said Greg Enriquez, CEO at RedSeal. “RedSeal has spent over two decades helping customers reduce risk by visualizing and validating exposures across IT (on-prem, cloud, remote workers), OT, and IoT environments. Our experience, customer focus, and vast third-party integrations gives us a

unique advantage in the market. We continuously align our roadmap to address current threats, respond to customer requirements, and leverage advanced technologies.”

The RedSeal Platform, available both as an on-premises and SaaS solution, enables organizations to model every asset, connection, and exposure across their hybrid environments. With over two decades of experience supporting large-scale enterprise and government networks, RedSeal continues to advance exposure modeling, risk prioritization, and compliance across regulated industries.

RedSeal's latest advancements since the evaluation period include AI-informed impact validation, agentic AI security team augmentation, workflow automation with a low-/no-code builder for remediation, and threat-actor modeling and attack simulation, delivering efficiencies for customers in support of its vision: enabling organizations to know their hybrid digital environments better than any adversary.
