EINPresswire.com/ -- Prime 1 Studio announces the start of pre-orders for a new statue from GUILTY GEAR -STRIVE-: Baiken from the Ultimate Premium Masterline.

Baiken is presented in a pose inspired by the key visual from the game, featuring a low stance and her weapon, Namakura. The statue applies a cel-shading paint approach intended to reflect the 3DCG style used in the title. Each surface is painted with defined color separation and shadow placement, aiming to reproduce the visual impression seen in-game in a physical 1/4 scale format.

Details such as the scar beneath her goggles, the shape of her hair, and the patterns on her kimono and haori are sculpted and painted to match the design of the character. Clear material is used for her hair, combined with controlled gradients to create a sense of motion. The costume incorporates layered fabric elements, including skull and plum-blossom motifs referenced from the source material.

The base includes Japanese-themed elements related to Baiken's stage and animations, such as maple leaves and a stylized slash effect.

The Bonus Version includes an additional left arm part holding a sake flask.
