Rise in territorial conflicts throughout the world and increase in demand for guns for competitive sports are expected to drive the shooting and gun accessories market growth during the forecast period. However, stringent government regulations on gun ownership is one of the prominent factors that are expected to restrain the growth of the shooting and gun accessories market during the forecast period. Moreover, rise in defense expenditure globally is one of the major factors that is expected to supplement the shooting and gun accessories market. At present, North America is the highest revenue contributor, followed by Asia-Pacific.
