

DevSecOps Managed Services Advance IBN Technologies Secure-First Transformation Strategy

IBN Technologies' DevSecOps Managed Services embed security across the software lifecycle, accelerating delivery while maintaining compliance and resilience.

MIAMI, FL, UNITED STATES, November 28, 2025 /EINPresswire.com/ -- Today's digital landscape demands rapid software delivery, yet this accelerated pace often introduces significant security risks for organizations. [DevSecOps Managed Services](#) are revolutionizing how businesses approach software creation by integrating security across the entire development lifecycle, from planning and writing code to testing and deployment. This holistic approach ensures applications are built with security at their core, helping companies avoid costly security flaws and mitigate reputational threats.

IBN Technologies: Expert in Outsourced Finance and Accounting Services

In response to the increasing need for both speed and security, IBN Tech is spearheading the adoption of DevSecOps Managed Services to refine its software delivery operations. By aligning development, security, and operations teams within a unified structure, IBN Tech is driving innovation while enforcing strong security protocols. This strategic evolution not only boosts the company's technological capabilities but also underscores its dedication to providing secure, dependable solutions in today's complex digital environment.

Industry Threats Requiring Urgent and Strategic Response

Contemporary software development is struggling with pressing security issues that outdated methods fail to resolve:

- Siloed and fragmented security tools causing operational gaps and oversight issues
- Manual compliance workflows delaying releases while increasing audit vulnerabilities
- Developers pushing back against security reviews seen as unnecessary barriers
- Insufficient expertise due to ongoing DevSecOps talent shortages across teams
- Major complexity adding IaC scanning and SAST processes into established CI/CD systems

Key DevSecOps Capabilities Enabled by the IBN Tech Platform:

IBN Tech delivers a complete spectrum of DevSecOps Managed Services that embed security into every phase of software development, helping address major industry challenges.

□ DevSecOps Assessment & Roadmap: A rigorous maturity diagnostic uncovers pipeline, tooling, and cultural gaps, generating a refined roadmap that outlines immediate improvements and future evolution.

□ Secure CI/CD Integration: Tools like SonarQube, Fortify, and Snyk enable the integration of SAST, SCA, and DAST into CI/CD, automating vulnerability detection and enforcing continuous compliance.

□ Secure Cloud DevOps Pipelines: By applying “policy as code,” IBN Tech secures AWS and Azure cloud platforms, removing misconfigurations and promoting consistently secure operational environments.

□ Secure Code Practices & Developer Enablement: Teams receive secure coding rules, targeted developer training, and triage models that provide actionable vulnerability data to accelerate remediation.

□ Governance, Compliance & Reporting: Automated evidence and reporting support frameworks such as SOC 2, ISO 27001, GDPR, and HIPAA, reducing manual audit tasks and improving compliance efficiency.

Driving Results: Strong Security with Faster Time-to-Market

Organizations leveraging DevSecOps Managed Services are achieving both accelerated delivery and strengthened security from development to deployment.

- One financial services leader reengineered its pipeline by integrating automated security testing, constant monitoring, and compliance validation across CI/CD operations.
- The outcome included a 40% drop in critical vulnerabilities during initial development, a 30% reduction in release timelines, and increased team agility without compromising security.

Advancing the Future of Secure Engineering Delivery

Enterprises accelerating digital transformation now recognize the need for holistic security practices embedded directly into the development lifecycle. Market indicators highlight this industry realignment: MRFR projects that the DevSecOps sector, which stood at \$6.59 billion in 2022, will grow to \$23.5 billion by 2032. This surge reflects rising confidence in automated compliance, continuous monitoring, and integrated security tooling that strengthens both

velocity and resilience. The industry's rapid adoption signals that proactive security engineering has shifted from a value-add to a mission-critical requirement for protecting customer trust and ensuring business continuity.

In response to this evolving landscape, IBN Tech is investing in expanded automation, intelligent security coordination, and advanced multi-cloud and container-native integration. As DevSecOps Managed Services become a foundational discipline for modern engineering teams, the company continues to help clients establish scalable, mature, and continuously secure pipelines. This strategic direction empowers enterprises to innovate at pace while maintaining adherence to evolving regulatory expectations, positioning IBN Tech as a trusted catalyst in building future-proof, security-first digital ecosystems.

About IBN Technologies□□□□□□□□

[IBN Technologies LLC](#) is a global outsourcing and technology partner with over 26 years of experience, serving clients across the United States, United Kingdom, Middle East, and India. With a strong focus on Cybersecurity and Cloud Services, IBN Tech empowers organizations to secure, scale, and modernize their digital infrastructure. Its cybersecurity portfolio includes VAPT, SOC & SIEM, MDR, vCISO, and Microsoft Security solutions, designed to proactively defend against evolving threats and ensure compliance with global standards. In the cloud domain, IBN Tech offers multi-cloud consulting and migration, managed cloud and security services, business continuity and disaster recovery, and DevSecOps implementation—enabling seamless digital transformation and operational resilience.□□□□

Complementing its tech-driven offerings, IBN Tech also delivers Finance & Accounting services such as bookkeeping, tax return preparation, payroll, and AP/AR management. These are enhanced with intelligent automation solutions like AP/AR automation, RPA, and workflow automation to drive accuracy and efficiency. Its BPO Services support industries like construction, real estate, and retail with specialized offerings including construction documentation, middle and back-office support, and data entry services.□□□□

Certified with ISO 9001:2015 | 20000-1:2018 | 27001:2022, IBN Technologies is a trusted partner for businesses seeking secure, scalable, and future-ready solutions.□□
