

ANY.RUN Announces Integration with Tines to Accelerate SOC Response with Intelligent Workflows

DUBAI, DUBAI, UNITED ARAB EMIRATES, March 12, 2026

/EINPresswire.com/ -- [ANY.RUN](#) has launched a new integration with Tines, the intelligent workflow platform, enabling security teams to validate threats faster and enrich alerts automatically within the workflows they build in Tines. The integration brings sandbox detonation, IOC extraction, and real-time threat intelligence directly into the workflows teams build in Tines, reducing manual checks and improving decision accuracy.

Inside Tines, ANY.RUN's Interactive Sandbox and Threat Intelligence

Lookup provide a single source of verified behavior and fresh IOC context. The sandbox automatically analyzes files and URLs and returns the activity it observes, while TI Lookup adds reputation and history for new indicators. Together, they supply the evidence needed to route alerts accurately and keep workflows running smoothly, even during high-volume periods.

████████████████████ ██████████ ██████████ ██████████ ███ ████████

The integration introduces several measurable improvements that strengthen triage, accelerate investigations, and support more efficient response operations.

- Lower MTTR: Automated detonation and enrichment provide verdicts and IOCs within minutes, accelerating investigation cycles.
- Higher triage accuracy: Behavior-based verification reduces false positives and supports

clearer, evidence-driven decisions.

- Greater capacity without new hires: Routine analysis runs automatically inside Tines, maintaining coverage during alert spikes.
- Consistent SLA delivery for MSSPs: Reliable enrichment and rapid validation strengthen service quality and response timelines.
- Faster detection-to-mitigation: Unified workflow shortens the time from initial alert to containment while reducing manual workload.

The integration is easy to enable, requires no complex setup, and works out of the box with Tines automated workflows, helping SOC teams adopt behavior-driven automation in minutes.

To explore its full capabilities and see how it strengthens investigation workflows, visit the [ANY.RUN blog](#).

ANY.RUN

ANY.RUN helps security teams understand threats faster and take action with confidence. Trusted by more than 500,000 security professionals and over 15,000 organizations worldwide, the solution combines interactive malware analysis with real-time threat intelligence to support accurate triage and quicker response. Its Interactive Sandbox, Threat Intelligence Lookup, and Threat Intelligence Feeds provide clear behavioral evidence and up-to-date context for SOC and incident response operations.

Tines

Tines is the intelligent workflow platform trusted by the world's most advanced organizations. Companies like Coinbase, Databricks, Mars, Reddit, and SAP use Tines to power their most important workflows. With Tines, they've built a secure, flexible foundation to operationalize AI agents and intelligent workflows, unlocking productivity, moving faster, and future-proofing how work gets done.

Co-headquartered in Dublin and Boston, Tines has raised \$272M from investors including Goldman Sachs, SoftBank, Felicis, Addition, Accel, Blossom Capital, and Lux Capital.
